## Multi-Purpose Biological Cleaner and Deodoriser

**Ideal as**

*Drain Cleaner and Opener  
Grease Trap Maintainer  
General Purpose Deodoriser Cleaner*

*Safe, Non Toxic to Humans or Animals, Biodegradable,  
Non Acidic, Non Caustic, Guaranteed Non Pathogenic Strains*

**Safe • Effective • Environmentally-friendly**

Net Contents:                      Litres

## Multi-Purpose Biological Cleaner and Deodoriser

**Mode of action:** The powerful stabilised blend of bacterial spores and enzymes in BioPlus quickly break down complex organic compounds found in waste matter. BioPlus is the perfect solution for drain clogs, grease trap maintenance and for controlling the toughest industrial odor problems.

### DIRECTION FOR USE:

**Surface cleaner & deodorizer:** Use BioPlus to clean walls and other surfaces through spray method or by mopping the floor.

**For washroom and toilet surfaces or refuse bins:** Add 25ml BioPlus into 500ml bottle sprayer with water or 25ml with every 5 liters water for cleaning and apply uniformly, particularly on areas where spills can occur.

**Carpet, upholstery & fabric:** Add 25ml BioPlus to every 5 liters of mixed cleaning solution or add 25ml BioPlus with 500ml water and apply with sprayer to soak until spot or odor has been eliminated. Repeat application if necessary.

**Odor control:** Add 1 part BioPlus to 20 parts water to spray or mop on floors, refuse containers, sanitary systems or other surfaces and do not rinse.

**Drain & grease trap maintenance:** Shake well before use. BioPlus works best when allowed to work uninterrupted or overnight when minimum drain water is discharged. For slow drains, pour 125ml to 250ml of BioPlus directly into each drain, kitchen sink, shower, lavatory, or commode with preferably warm water to activate the product and let stand overnight. Repeat in two or three days. (If drain have not improved, check for obstruction)

**Maintenance dosage:** Add 100ml BioPlus every 2 weeks into each drain opening. For grease trap, add 100ml BioPlus daily into kitchen drain at the end of work.

**Safe • Effective • Environmentally-friendly**
