#### DILUTION INSTRUCTIONS & HOW TO USE:

Dilute with water between 1:10 to 1:50 as below

Dilute 1 part concentrate with 9 parts tap water for dirty conditions or high risk areas such as those requiring full mycobactericidal efficacy in dirty conditions. For low risk areas or areas the product can be used by diluting 1 part concentrate with 49 parts water.

Product does not need to be rinsed off, and must not be rinsed off for 30 minutes for full virucidal performance. See data sheet for contact times. For use on beds, frames, tables, counters and any surface.
