- Product description: pesticide insecticide
- Product use: type B/C outside food areas

"Passed AsureQuality assessment for food/beverage/dairy factory Type B/C outside food areas" H2291" with conditions. This assessment was prepared by Global Proficiency Ltd using HACCP principles to determine equivalence with food standards listed below. See <http://assessedproducts.asurequality.com/> This supports food Risk Management Programmes & other endorsements that may apply to this product include MPI regulated farm dairy approval, MPI dairy factory endorsement, MPI regulated non-dairy animal product approvals, EPA HSNO-OSH-environment approval (& previously AQIS).

Special conditions: type B/C outside food areas (for no residue contributing to fly fall in food areas & no potential food contact - with food, food contact surfaces, vents or packaging).

General conditions:

- The product is to be used according to Manufacturer's Instructions, Good Manufacturing Practice (GMP), and applicable legislation.
- The assessment is subject to notification of change (e.g. in formulation, raw materials or instructions) and expires on 11/12/2018).
- The full report is attached for supplier review and verification. The assessment is activated by countersigning.

Prepared by Global Proficiency for AsureQuality Ltd...

Supplier:.....

Date: 13/12/2013

Scope and purpose of the assessment:

- Asurequality assessment is a non-regulated, voluntary, and evidential certification by the supplier demonstrating equivalence with food safety standards, and also that product instructions address hazards for staff & equipment. The assessment is independently confirmed, without prejudice or guarantee, using information submitted by the supplier or from other sources. Confidentiality of the product formulation is maintained using coded material identifiers in the report, and appendices containing confidential information are provided only to the supplier.
- Scope: NZ checks (FSANZ, US FDA 21 CFR/ NSF, Food Chemicals Codex, EPA NZ, EU, French culinary listings or related data for equivalent safety). NZ background (Animal Products Act, Risk Management Programmes. Detergent & Sanitiser Manufacturer's Code of Practice) Detergent & Sanitiser Standards and Analytical Methods. Quality Manual - Assessment Procedures.

Summary of assessment with risks highlighted:

- Other registrations: MPI cat B insecticide 1 not permitted in any edible area or any area where edible product or packaging material is stored. 2 It must be used in a manner that prevents the entry of insecticide into edible product areas or stores containing packaging material. (AQIS may have other non-residuals interpretation. Lit shows moderate residual effect for active).
- Food safety is per no potential contact & listings in the table.
- QA, QC and side effects are n/a for non-contact.
- Label (name, pictograms, target species, active ingredient 200g/L Cypermethrin..& sections for hazard classifications, approved handler, record cleaning, combustible, toxicity – eco-toxicity - handling precaution warnings, disposal, spillage, first aid, directions for use - for houses, flats, factories, shops, warehouses, restaurants, meat & dairy processing plants, against target listed 25-50 ml/5L with application details and frequency up to 6 weeks, target strategies, food contamination warning is thorough vs all criteria. Notice warning further information and approvals and use of approved handler.
- Efficacy is per prior registrations & eg MRLs for the active.
